

Find Your Perfect Fit!

We want your custom team apparel to feel just as good as it looks! Since sizes can vary between different garment styles, using our quick fit guide is the best way to ensure everyone on your team gets a comfortable, perfect fit.

Instead of guessing sizes or trying to measure your body directly, find a favorite, well-fitting shirt or sweatshirt you already own, lay it completely flat on a table, and measure it as shown below for flawless results.

How to Measure

A. Chest Width	Measure straight across the chest exactly 1" below the armhole seams.
B. Sleeve Length	Measure starting from the center back of the neck, running out across the shoulder, and down to the end of the sleeve cuff.
C. Back Length	Measure straight down the middle of the back from the collar base seam to the absolute bottom of the shirt hem or waistband.

Need Sizing Samples?

If you are ordering for a large team or want sample garments sent directly to your office to try on before finalizing sizes, reach out to your Westkey Xibita representative or call us below.

Westkey Xibita: 1-800-663-9952

**Pro-Tip: For the absolute best results, always lay the template garment completely flat on a rigid surface before measuring. Fabric bunching can alter your final layout specs.*
